

PRIVACY AND SECURITY MUST BE

non-negotiable when
choosing how to
measure workplace
performance.

60% OF EMPLOYEES SAY
NO TO CAMERAS

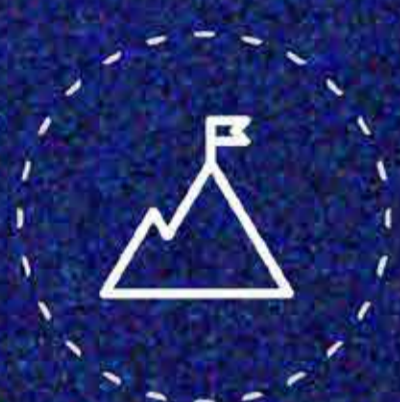

Most employees would feel uncomfortable at work if employers used camera-based technology to monitor utilization.

[SOURCE](#)

EMPLOYEES ARE
INCREASINGLY VOCAL ABOUT
THEIR EXPECTATIONS FOR
PRIVACY.

That leaves only one option:
Technology that's
anonymous at source.

ANONYMOUS AT SOURCE MEANS

The technology is
incapable of capturing
personally identifiable
information.

There is no need to worry about someone intercepting or stealing the data and using it for malicious purposes.

It's the difference
between don't be evil
and can't be evil.

Density uses sensors,
not cameras. And we
anonymize data at the
point of collection.

That is why Fortune
500 companies choose
Density over other
solutions.

Take the guesswork out
of your workplace.
